SUMMARY

Data Analyst with a strong engineering background. Experienced in large-scale data analysis, building ETL pipelines, and developing business-oriented data models utilizing SQL, Power BI, Excel, and Python. Proven track record in supporting decision-making processes by designing interactive dashboards and reports using DAX. Driven to create measurable business value through data-driven solutions.

TECHNICAL SKILLS

- MS Excel (Pivot Table, Power Query, Data Cleaning, Lookup Functions (VLOOKUP, XLOOKUP), INDEX & MATCH)
- SQL (JOIN, Subquery, Window Functions)
- Power BI (DAX, Data Modeling, Power Query)
- Python (Pandas, NumPy, Data Analysis, Automation)

PROJECTS

Sales Analysis and ETL Processes | SQL, Power BI, Power Query (ETL Focused)

- Executed ETL processes, data cleaning, and transformation on 227M+ rows of transactional purchase data leveraging SQL (JOIN, Window Functions, Subqueries) and Power Query.
- Developed complex DAX measures to analyze total sales, average purchase value, and order status metrics.
- Designed optimized, interactive dashboards utilizing Waterfall, Funnel, and Donut visualizations.

Sales Performance and Business Analytics | Power BI, DAX, Data Modeling (Analytics Focused)

- Processed, transformed, and built an optimized data model for 50M+ rows of sales data using SQL and Power Query.
- Analyzed sales trends, profitability, and ROI metrics using Waterfall, Area, and Scatter plots.
- Computed dynamic KPIs and implemented user-friendly interactive filtering systems through advanced DAX formulas.

NVIDIA Global Sales & AI GPU Analysis | SQL, Power BI, Advanced Visualization

- Cleaned, transformed, and engineered an optimized data model for NVIDIA sales data via SQL and Power Query.
- Authored advanced DAX expressions and created dynamic filtering systems to calculate key performance indicators such as Gross Sales (433B), Profit (48B), and Cost (36B).
- Delivered interactive analysis on AI GPU (H100/A100) sales, regional trends, and profitability using Waterfall, Decomposition Tree, and Scatter plots.

EDUCATION

Innab Academy | Data Analytics (2025 - 2026)

Azerbaijan State Oil and Industry University | Bachelor of Science in Process Automation Engineering (2020 - 2024)

Code Academy | Frontend Developer (2022 - 2023)

CERTIFICATIONS

- Data Analytics Specialist (MS Excel, SQL, Power BI, Python) | Innab Academy
- MS Excel | Human Resources Academy
- MySQL Database & Frontend Developer | Code Academy
- Python Programming | IDEA

ADDITIONAL INFORMATION

- **Languages:** Azerbaijani (Native), English (B1), Russian (A1)
- **Mathematical Competencies:** Statistical Analysis, Hypothesis Testing, Analytical Thinking, Problem Solving.
